

Dear teachers:

Good afternoon, nice to meet you. It is my pleasure to have this opportunity for this interview and I hope I can make a good performance today.

My name is Jiaxun Yang. I am from Nanchang University and majoring in software engineering.

First of all, through my diligent study, my academic grade ranked in the top 0.8%. As the first in the class, I won 7 honors such as special scholarship and national inspirational scholarship for two years.

I started to participate in professional competitions because of my outstanding advantages in programming. I am invited to Beijing to participate in the Baidu Youth AI Maker Training Camp and Won the title of excellent camper.

In my opinion, I am a self-motivated person who is willing to make continuous efforts.

In my spare time, I like playing basketball and photography very much, through which I can meet the challenge better .

Above all, Fudan University is my ideal place for further study!

I sincerely hope you can give me a chance to study in your school. Thank you very much for you to listen to my self introduction.
