

Dear professors: Good morning, nice to meet you. It is my pleasure to have this opportunity for introducing myself and I hope I can make a good performance today.

My name is Jiaxun Yang. I am from Nanchang University and majoring in software engineering.

Next, let me introduce myself from learning ability, academic competition, research achievements, and hobbies.

First of all, undergraduate students must lay a solid foundation in academic knowledge. Through my diligent study, my academic grade ranked first in 404. And I have won 7 honors such as special scholarship and national inspirational scholarship for two years.

Because my programming ability is good, I started to participate in professional competitions. I have won 7 national awards including AI competition and programming competition.

With the deepening of theoretical knowledge, I began to shift the focus of my research to scientific research. And have a research experience on small object detection. In 2020, as a second author (first tutor), I submitted a article in IEEE Systems Journal. In 2019, I set up a national training project and applied for a patent and software copyright.

In my spare time, I like playing basketball and photography very much through which I can meet the challenge better.

Above all, Peking University is my ideal place for further study! Finally, thank you very much for listening to my self introduction. I sincerely hope you can give me a chance to study in your school.
